

Case Study

Program Management Information System, centralized tool for monitoring and evaluation of people, process and cost parameters of the mission mode projects

Client

A leading development company in Saudi Arabia is working in line with Vision 2030 with the purpose to honor rich heritage of the country.

Challenges

Our client works on mission critical activities and was facing following challenges:

- Lack of visibility of project information due to non-configurable dashboards
- Delayed project activities impacting deadline and costs
- Challenges in taking business decisions due to unavailability of portfolio level view
- Difficulty in taking decisions due to Scope creep
- Communication gap between key project stakeholders and project teams working in silos
- Facing difficulty in managing dashboards in development environment.
- Historical data Migration of Change Management and Cost Management in Unifier.
- Cost Management and Change Management process are not being used effectively

LTI Solution

- Implementing Primavera Unifier functionality to include the Cost Processes, Change Management Processes, Close Out processes to get the complete Cost Report at detailed level
- Implemented Unifier Single Platform as an Automated Project Business Process & Workflow management system
- Implemented 25 business processes and workflows for Project Initiation, Contract Management, Cost Controls, Change Management and Project Close Out related processes
- Integration of SAP ERP with PMIS
- Creation of dashboards and Planning, review and monitoring of KPIs
- Migrated all the Development Dashboards to Production environment with modifications.
- LTI is currently assisting the Client in historical data migration
- Working with client sub contactors to capture the changes that will enhance the full-fledged usage of Cost and Change Management Processes

Technology Components

 Oracle Primavera
P6 EPPM

 Oracle
Primavera Unifier

 Oracle
Aconex

 Oracle
SOA

 Tableau
