L&T Infotech & GE Digital Announce Global Strategic Partnership to Develop Digital Industrial Solutions

Synergies from industry domain expertise and digital capabilities offer a unique value proposition

Mumbai (India), July 27, 2016: L&T Infotech (NSE: LTI, BSE: 540005), a global information technology services & solutions company, today announced a strategic partnership with GE Digital combining LTI's diverse industrial capabilities with GE's Predix cloud-based operating system for the Industrial Internet. LTI and GE Digital will collaborate to develop innovative digital-industrial solutions powered by Predix analytics and real-time insights to enhance competitiveness and transform the way companies manage their assets and workforce.

LTI's Industrial IoT Practice develops comprehensive solutions and applications encompassing smart sensors, connected machinery, real-time visualization and advanced analytics. As strategic partners, the two companies will synergize their group industrial heritage and domain expertise to deliver Predix-enriched applications for various industries like:

- **Oil & Gas** - Solutions encompassing Next Generation Digital Oilfields; Integrated Refinery Operations Management; Advanced Pipeline Operations; and Prime Plant, an early warning system for critical equipment failure
- **Power & Utilities** - Digital Industrial solutions that address the end-to-end value chain in the power sector from power generation to transmission and distribution
- **Construction** - Solutions to address high impact asset productivity, spares consumption, process digitization and safety issues concerning the construction sector
- **Industrial Manufacturing** - Smart Manufacturing solutions for digitizing all facets of manufacturing processes; Remote monitoring and predictive analytics of field equipment

LTI and GE Digital will explore the concept of an Innovation Center to tap into their rich industry knowledge to quickly bring to market scalable digital solutions based on real-life scenarios.
