

Flexagon announces partnership with LTI

Green Bay, Wisconsin (October 02, 2017) – Flexagon, an innovative provider of DevOps and Continuous Delivery Software, today announced a strategic partnership with LTI, a global technology consulting and digital solutions company. As part of this partnership, LTI’s clients using Oracle Suite of products will have access to Flexagon’s market leading platform FlexDeploy to deliver DevOps solutions that support strategic digital transformation.

Historical approaches to software deployment and releases use a variety of manual and script-based solutions, leading to slow, labor intensive, and error-prone delivery of software. With automated delivery via FlexDeploy, enterprises can expect a 10x faster deployment speed on average and an ROI of less than 3 months.

“We are thrilled that LTI has chosen to partner with us to provide a DevOps solution to their clients.” said Dan Goerdt, president of Flexagon. “LTI has a proven track record of providing innovative, end-to-end solutions. With FlexDeploy organizations get the automation, visibility, and controls to deliver better quality software faster, at a lower cost and risk.”

Aftab Ullah, COO, LTI said, “Businesses are moving at a more rapid pace now than ever before. IT teams need to be able to keep up with this highly demanding environment where existing delivery methods are unable to match the desired speed. Our partnership with Flexagon offers our clients the benefits of leveraging LTI’s strong technical capabilities with a DevOps platform that results into incredibly faster release cycles.”

About Flexagon:

Flexagon provides DevOps software and services which improve the speed, quality, and cost of software development and operations. Flexagon’s FlexDeploy is a market leading DevOps and Release Automation product which standardizes and automates software provisioning, build, deploy, and release processes. FlexDeploy includes pre-built plugins for Oracle Database, Fusion Middleware, E-Business Suite, Cloud, and many open-source and commercial technologies.
