

Case Study

Application Security Assessment under
Advanced Threat and Vulnerability
Management

Client

The client is a leading US multinational financial service group

Challenges

The client faced following challenges:

- Identified applications were not included previously as a part of the security assurance program of the bank
- The bank required faster turn-around times and detailed elaboration of the test results that could help the stakeholders close the identified vulnerabilities

LTIMindtree Solution

- Performed application security testing, SAST and DAST including manual tests, as per OWASP, SANS and WASC guidelines to meet the security compliance needs
- Detailed analysis including the business impact on exposure related to vulnerabilities with automated tracking of status between subsequent tests

Business Benefits

- 200+ assessments until date leading to identification and mitigation of 25+ unique security coding vulnerabilities across applications
- Enabled the bank in building secure applications by partnering in the early stage of Software Development Life Cycle (SDLC)

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world.
