LTIMindtree

LTIMindtree Digital Identity Services

**LTIMindtree**

Introduction

Internal frauds and breaches riding over and using Weak Access Mechanisms, Impersonation, Lack of Integrated Identity Governance and Inadequate Authorization have been a constant threat to the organizations.

Whether privileged accounts or internal users with critical work flow roles, it's extremely important to enforce authorization and monitor the activities such that organizations achieve desired levels of compliance and protect the assets from unauthorized access and modifications.

LTIMindtree's Digital Identity Platform incorporates Identification, Authentication and Authorization,

coupled with advanced monitoring & analytics engines and offers complete protection from unauthorized access and modifications.

LTIMindtree's Digital Identity Analytics and Orchestration Platform enables enterprises to realize tangible business value, including increased operational efficiency, orchestration, robust security, simplified regulatory compliance, and enhanced employee & customer satisfaction. It helps in building and enforcing organization-wide identity and access management policies and procedures.
