

# Case Study

Security Assessment of IoT Assets and  
Develop Central Admin PIN

## Client

The client is a Fortune 50 Oil and Gas Major.

## Challenges

The client faced, following challenges:

- PIN development for multiple plant locations with independent infrastructure and processes
- Assessment of applications and processes implemented at the individual plant level

## LTIMindtree Solution

- Perform cyber security assessment of the in-scope IT and OT components across the identified plants and formulation of the security roadmap including improvement areas
- Develop the Central Admin PIN to provide centralized management and control of the facility level PINs and deploy standardized PIN environments at each facility
- Develop and deliver a cyber-security awareness training course

## Business Benefits

- Identification of cyber security areas for improvement of the cyber security posture

**LTIMindtree** is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world.
