Automated Data Discovery, Classification and Labelling - **PrivateEye**

Business Challenges

With new and changing regulations, organizations have begun to perfect their data management processes and technologies. However, based on our experience, most organizations struggle with the following:

- Lack of clarity in the type of personal data that resides in the application / database landscape
- Identification of sensitive data in unstructured file formats from voluminous data
- Sensitive data discovery from voluminous data across diff types of data sources
- Keeping track of changes made to personal data
- Global enterprises with multiple languages
- Knowing if the data is encrypted or not and who has access to sensitive data

Capability

A complete toolkit which spots data breaches instantly, and allows you to track sensitive fields added, removed or modified in new releases. Augment data breach reports into a customizable dashboard, integrate it into any CI/CD process and obtain compliance reports via notification application in real-time.

- ✓ Consumer data search in multiple data sources based on a combination of parameters
- ✓ Index search for faster results without storing any data
- ✓ Randomly scan rows after setting a row limit, for more accurate results
- ✓ Ability to scan structured and unstructured data on-premise and on cloud
- ✓ Multilingual support
- ✓ Multithreaded support
- ✓ Confidence level in the sensitivity of the metadata found without storing / displaying any data
- ✓ AI ML engine to identify and learn for organisation specific fields
- ✓ Database schema information
- ✓ Consumer intake request form
- ✓ MS SDK integration to classify and label documents and apply policy specific restriction

How it works

PrivateEye has role-based access that helps configure and scan multiple databases to identify sensitive fields that contain any structured, unstructured, PII, PCI and PHI data. It provides both flexibility and country-specific customization to select, add and execute algorithms to discover sensitive data.

Sneak peek

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700+ clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by nearly 90,000 talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — combines the industry-acclaimed strengths of erstwhile Larsen and Toubro Infotech and Mindtree in solving the most complex business challenges and delivering transformation at scale.
