SAP Rollout for One of the Largest Cement Manufacturers in Europe

Client

Europe-based, one of the world's largest cement manufacturers, with global presence.

Challenges

- Regional IT integration to a common regional template (SAP).
- Legacy Application replacement with the SAP MEA Business Model Template to facilitate integration of the new group into a standard set of processes and solution.
- Agile Solution capable of integrating with legacy systems and addressing local legal requirements.
- Scalable Support Model for countries live on SAP.

LTIMindtree Solution

- Reverse Business Engineering Tool (MOSAIC Profiler).
- Early Buy-in of Solution using "See-Believe-Accept" – CRP Lab and Prototyping.
- Template Governance using SolMan.
- Industrialized approach for common activities across rollouts (Factories for RICEFW, Config, Data, testing).
- Lean onsite team at Hub Locations.
- Wave-based rollouts.
- Systematic release plan.

Business Benefits

- Successful migration from JDE to SAP for SA and Egypt. Nigeria and Algeria in progress.
- Business transformation enabled by harmonized ERP for the entire organization.
- Seamless user acceptance with organization change management from mobilization phase to stabilization.
- Execution of business intervention plans and mobilization of the entire organization.
- Optimized resource utilization and synergies of execution.
- Focused Change Management and Data Management at each country for easy adoption.
