Case Study

Data Privacy assessment for a
leading Danish Retail Company

Client

The client is a leading Danish Retail Company that operates as a convenience goods retailer, in the fields of retail, wholesale and food service.

Challenges

- ✓ Identification of sensitive data fields on 800 remotely located end-point devices (laptops and desktops) and production servers with 24.5TB of data.

- ✓ Analysis of sensitive data across unstructured, custom and semi-structured files.

LTI Solution

- ✓ Parallel data scan using LTI's automated assessment solution installed on 800 end-point systems through an MSI package.

- ✓ Scanned email attachments and Google drive documents as a part of unstructured data.

- ✓ Customized approach to search for customized keywords and sensitive data fields.

- ✓ Multi-lingual scan of Norwegian, Swedish and Finnish identifiers, along with the Danish data.

Business Benefits

- ✓ Scanned over 8 million files in four weeks leading to cost and time savings of ~70%.

- ✓ Detailed analysis & inferences on each file / folder containing PDFs, excels, PPTs, images, flat files, word documents and custom formats.

- ✓ Provided a detailed implementation strategy report based on the analysis of the assessment.
