LTIMindtree

Mobile Application Security Testing: Leading Coffee Company

Client

The client is a leading Coffee company.

Challenges

- Security Testing of Mobile application to be made available on Android and iOS platforms.
- Manual verification for various high potential vulnerabilities to make sure that the mobile application is secure.
- Usage of multiple commercial and open source tools for complete coverage.

LTIMindtree Solution

- Security Assessment Testing on customer's mobile application available on Android/iOS.
- Security assessment also included best-practices tests.
- Automated and manual testing on Android and iOS applications.
- The tests on the mobile application focused on OWASP Mobile Top 10.
- Detailed assessment report with current risk snapshots, vulnerabilities and risk remediation steps.
- Remediation Consulting.

Business Benefits

Helped in assessing the security risk posture of mobile applications used by external parties.	Created visibility into security risks.	Remediation plans were shared to the developers/vendors to mitigate the identified risks.
