

## Case Study

# Securing Customer Data and Applications for a Large Insurance Company (UK)

## Client

The client is a leading UK-based insurance company.

## Challenges

- ✓ Security testing solutions to track and manage vulnerabilities for the web application containing sensitive information
- ✓ Comprehensive assessment and resolution of risk exposure of external facing assets accessible over internet through Port scan
- ✓ Assess the risk to public facing IP/URL addresses
- ✓ Assurance and closure for the identified vulnerabilities

## LTIMindtree Solution

- ✓ Performed black box and gray box security tests on applications
- ✓ Assessed the application security regimen of their applications and underlying infrastructure – Yearly assessment
- ✓ Pen test of Public IP addresses
- ✓ Port scanning of public facing IPs
- ✓ Hosted centralized portal for reporting, enabling close monitoring, and status checks
- ✓ Assessed the closure of security risk by conducting retest on the applications

## Business Benefits

Enhanced customer satisfaction by effectively tracking risks.

Increased confidence.

Identified critical risks for business-critical applications.

Suggested cost-effective risk-mitigation measures.
