

Case Study

Cost Efficient and
Seamless Integration with
Heterogeneous Hybrid
Systems and Migration to
**Cloud for a Local
Government Body
in the APAC Region**

Client

Our client is a local government authority serving the New South Wales region of Australia, providing highest quality service information in planning, service delivery, advocacy, grant funding, and school projects.

Business Scenario

The key requirement included end-point extraction of customer data and configuration from the legacy application, followed by data cleansing and consistent data supply to the new cloud application, in response to:

Lack of data governance and security framework to comply with statutory guidelines.

Need for low cost yet effective data integration capabilities.

Cross combining on-premises and cloud data and ingesting consistent data for the new application.

Performance issues with existing tool and data landscape.

LTIMindtree Solution

- Enabled ODI on cloud capabilities, effectively integrating on-premises legacy and cloud application, ingesting data in the required pattern

- Tailored integration process for Property, Finance, and NAR (Name and Address Register, Licenses, Trade Waste, etc.)

- Cloud-based scalable solution to handle growing volume and variety of data

- Compliant with local data residency and statutory requirements

Business Benefits Delivered

20% lower costs
with higher
computing efficiency.

Single view of data with
reduced complexity and
increased agility.

100% compliant
with data security and
statutory requirements.
