Fast-Track Your SAP S/4HANA Central Finance Deployment

LTIMindtree's CFIN Transformation Platform

Disparate financial systems in an enterprise means that C-level execs do not get enough visibility into cross-system finance data, which could result in lost or limited opportunities, high operational costs, and sub-optimal strategic decisions. CFOs and their teams are thus looking for ways to bring all relevant financial data across various ERP (SAP and non-SAP) systems onto one platform and contextually harmonize relevant data.

Make the move to Central Finance

Central Finance, a solution within SAP S/4HANA, replicates and transforms financial transactions from SAP and non-SAP systems in real-time. It creates an organization-wide financial platform that delivers:

- Statutory and management reporting
- Multi-level financial planning and forecasting
- Financial shared services
- Enhanced operational analytics

Central Finance is explicitly designed for businesses that have multiple ERP systems in their landscape and need to run a single central platform for corporate finance.

Moreover, it allows for enterprises businesses to benefit from SAP S/4HANA without a full-blown data migration.

But while Central Finance is the perfect fit for an enterprise, implementing it can be challenging.

The complexity of your business processes can make it difficult to harmonize data and processes from various source systems. You need the resources and skills to integrate your existing non-SAP source system data into your Central Finance implementation. LTIMindtree helps overcome these challenges while integrating financial data and plan ahead to a successful Central Finance deployment.

Introducing LTIMindtree's CFIN Transformation Platform

Based on our deep domain expertise and global experience in implementing financial solutions, our unique and comprehensive CFIN Transformation Platform addresses all challenges that crop up during a Central Finance deployment through:

- Data extraction from multiple source systems
- Data harmonization
- Intelligent data mapping using proprietary algorithms

The CFIN Transformation Platform brings in exceptional value in Central Finance Solution deployment through:

Digital Discovery

360-degree discovery across various source systems including the organization structure, data mapping (data key and value mapping), and processes.

Data Foundation and Harmonization

Comprehensive data analysis and building a standardized view across multiple ERPs, leveraging NLP-based data harmonization.

Consolidation

Convenient enablement of data and process mapping to Central Finance results in a consolidated information view, in the form an intuitive dashboard.

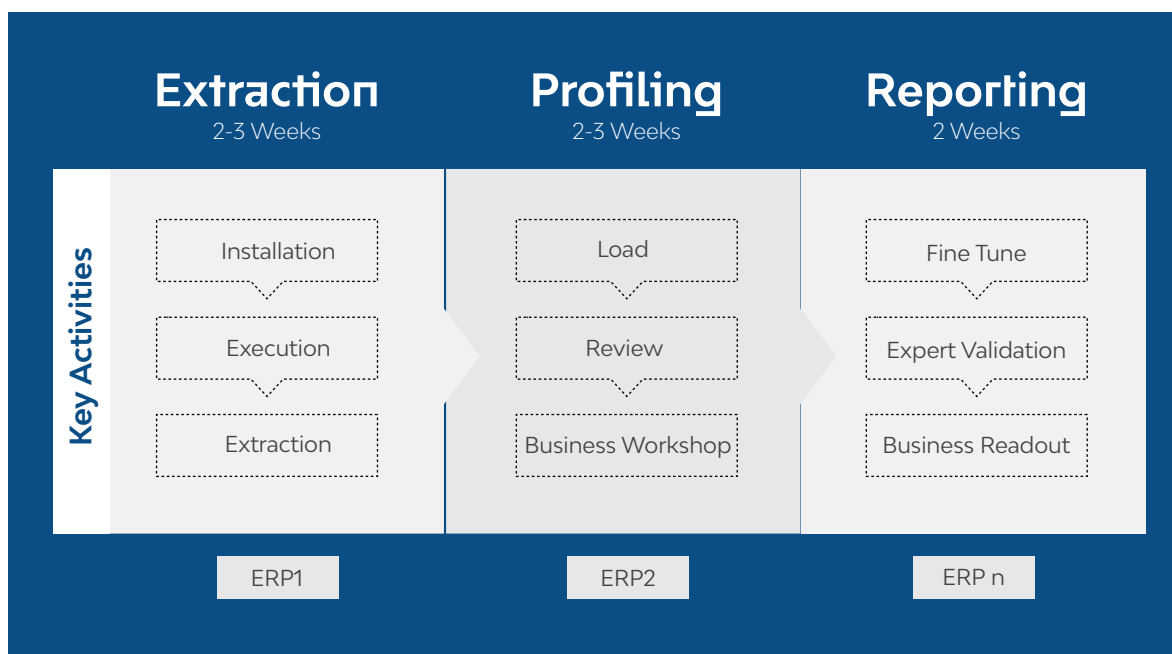

CFIN Transformation Platform helps accelerate the Central Finance deployment by 30%

Our CFIN Transformation Platform accelerates Central Finance implementations by creating a technical blueprint of the central finance solution in a short span of eight weeks, resulting in a 30% reduction in execution time and efforts.

How it works

We adopt a systematic approach to deploy the CFIN Transformation Platform solution in your ERP landscape and generate a Technical Blueprint for Central Finance in just eight weeks.
