Digitize the Core - Accelerate the Needs of a Digital Enterprise

LTIMindtree's Digitize the Core offering helps enterprises create a conversational and touchless experience of ERP processes, in their journey towards becoming a digital-native enterprise

Introduction

Digital transformation must begin at the core of any organization. To enjoy the benefits of being a true digital-native enterprise, organizations need to have a digital-led strategy that combines people, processes, and technology to deliver superior customer experiences.

- LTIMindtree is re-imagining business processes using AI/ML, and RPA capabilities to create touchless experiences on core Oracle ERPs.
- Our Digital Integration and APIfication solutions seamlessly connect information across enterprise systems in real-time, with enriched and trusted data from disparate sources providing insightful analytics.
- Modernize the applications and have an Evergreen ERP with LTIMindtree's proprietary ERP Upgrade Workbench and automated tools for security, and patch updates.
- With Operate, to Transform (O2T) framework and Enterprise BoTs, LTIMindtree is enabling enterprises to reap the benefits of operational efficiency and reliability.

Business Problem

Enhancing the existing application landscape to create an interconnected, networked eco-system is essential to respond quickly to the market changes and evolving customer behaviour:

- Enabling enterprises to digitize by keeping the core applications/ERP intact
- Migration to microservice-based systems for real-time data movement
- Modernize and Evergreen ERP with code current
- Operations beyond traditional support service

Our Solution

Touchless ERP

LTIMindtree holds a repository of 250+ automated business processes that deliver Touchless ERP for the entire value chain of an enterprise such as Procure to Pay, Order to Cash, Record to Report, Plan to Manufacture, Lead to Order, Hire to Retire, and Expense to Pay processes.

Touchless design and delivery through:

IoT & connected devices

AI & machine learning

Analytics

Conversational applications

RPA & chatbots

Digital Integration and APIfication

LTIMindtree Digital integration and APIfication services are uniquely positioned to help enterprises navigate the shifts in modern integration requirements.

- Accelerate integration development cycle by 20%
- Detect and resolve problems with real-time monitoring of applications, and integrations through our Digital Command Center offering.

Application Modernization

LTIMindtree Oracle Application Modernization services offer best-in-class services for web, mobile, cloud-native application development, application maintenance, and enhancements, and legacy modernization.

- Up to 30% faster upgrades leveraging upgrade workbench.
- Six ready-to-use enterprise mobile applications; 30% increase in business process turnaround time.
- Industry white space solutions for warehouse management and sub-broker payments.

Operate to Transform

- Predictive monitoring and “Hot-Spots” analysis led to incident elimination.
- Cognitive and persona-based self-service using guided QA bots.
- Ingenious Virtual assistants for end-users to support their day-to-day operations delivering CX-EX-UX.

Why LTIMindtree

- Touchless ERP library with 250+ automated business processes by business function.
- RPA/BOT store for efficient seasonal load handling.
- Reusable solutions to address industry white spaces.
- Support digitization through proven O2T model (automation, digital assistant, and mobility solutions).
- Digital Command Center for accelerated integration development and monitoring.
- Predictive monitoring and “Hot-Spots” analysis-led incident elimination.
- Cognitive and persona-based self-service using guided QA bots.
