LTIMindtree Life's In-process Label Management

Background

The labeling process is critical for maintaining compliance and is a unique identifier to prove authenticity of drugs and devices to health care professionals. It also ensures that active ingredients and concentrations are clearly understood

Organizations with SAP do not have ready to use label templates within the ERP system causing the need for costly customizations or dependency on third party solutions

Need for a more efficient, low cost and configurable Label Management solution within the SAP system

Highlights of Label Management

Ability to use In-built standardized labels in Cloud platform

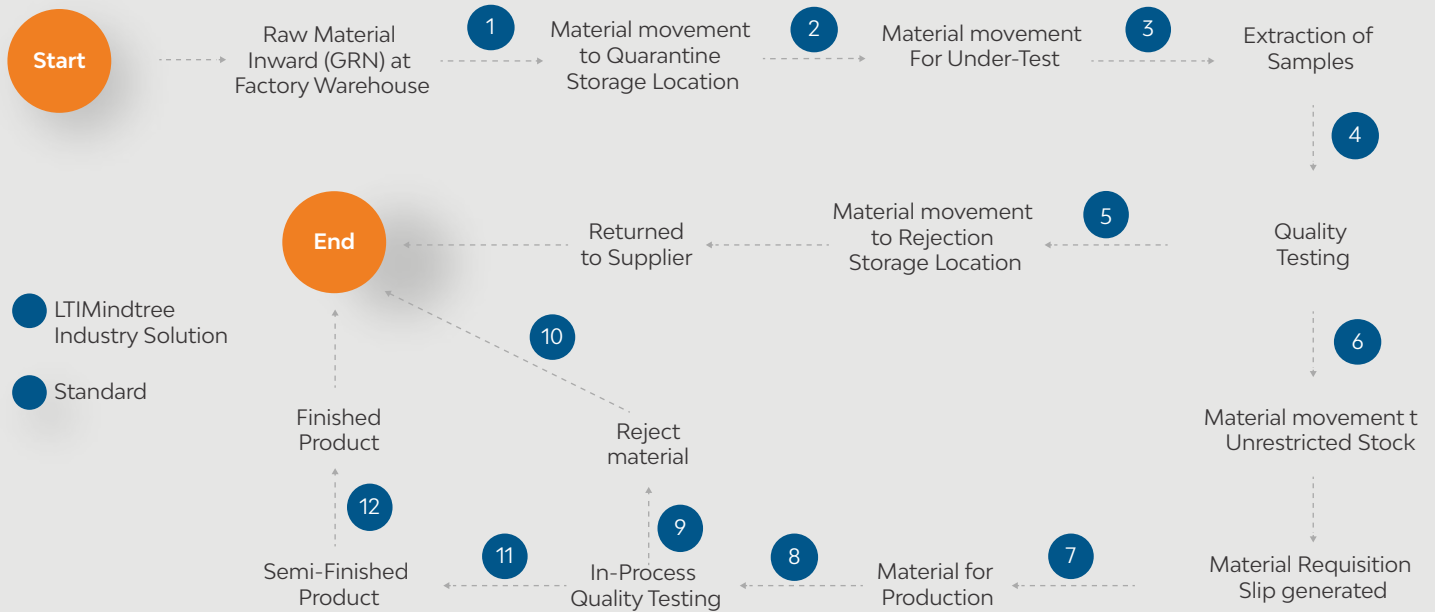

Built-in traceability for the entire label-process

Ability to enhance Label information quality

Ability to Interface with Artwork Labeling system

Elevate to IoT based solutions

Flexibility to change label templates in line with changes in regulation
