

**BROCHURE**

# **A New Era of Worker Productivity and Safety**

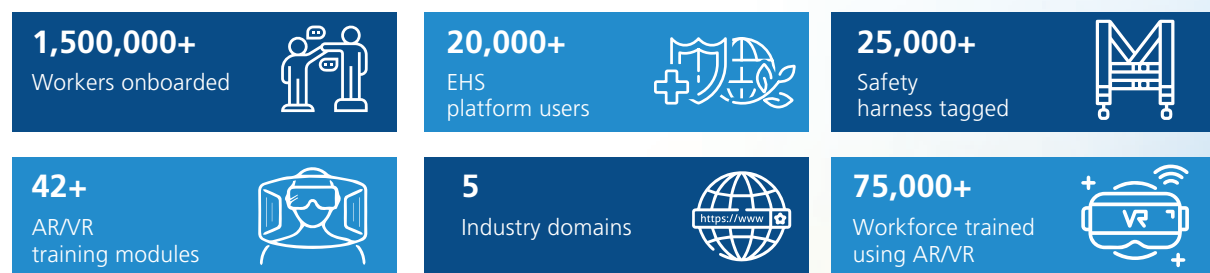

Worker NxT makes it easier for employers to identify, hire, train, and protect highly qualified and productive workers. Even in tight labor markets, our solution connects our clients to qualified workers and provides the intelligent tools they need to onboard, train, and manage them.

Once workers are on the job, our solution collects and analyzes real-time data to ensure worker safety and augments their physical and cognitive abilities. Our platform also streamlines costly tasks including attendance tracking, skills assessment, and safety assurance.

# Technology-enabled Training and Skill Enrichment

When digital transformation fails to meet expectations, it's often caused by gaps between strategy and execution. LTIMindtree NxT clients don't have to worry about that problem. LTIMindtree consultants provide expert workforce strategies based on best practices that have been refined through hundreds of client engagements.

Our clients can provide their workers with digital work instructions and guide them through complex tasks with the help of visual aids and contextual information delivered through augmented reality and mixed reality (AR/MR) experiences. AR devices can use 3D eyewear, smartphones, or tablets to overlay data, documents, and drawings onto machinery on production floors or jobsites. Workers can get on-demand training for factories, mines, oil rigs, and other environments from anywhere.

## Worker Productivity and Safety Across the Job Site

Our platform collects data from a variety of sources—including sensors embedded into clothing, headgear, goggles, gloves, and exoskeletons—to monitor health conditions, identify safety issues, amplify worker abilities, prevent injuries, and more. Sensors can also detect harmful chemical or physical agents and prompt the platform to provide clear instructions for workers so they can avoid injury.

Moreover, they can detect a worker's location, movement, and physiological state and provide alerts when situations pose a threat to safety.

## Recruitment, Onboarding, and Delivery Effectiveness

Our platform includes access to a pool of available labor tagged by specific search terms and skill requirements, integrating seamlessly with job boards, social media platforms, and other sources of skilled labor. You can quickly assess individual skills, determine availability, and offer employment. Once employees are in the system, our platform brings automation and precision to scheduling, onboarding, training, and ongoing performance assessment.

## Turn Industry 4.0 into a Growth Engine

Want to know more about how our workforce wellbeing and efficiency solution, Worker NxT, is part of a holistic approach to a profitable Industry 4.0 transformations?
