LTIMindtree and AT&T partner to build specialized connected & smart manufacturing IoT solutions

Partnership to leverage digital technologies at scale to provide connected outcomes and deliver actionable insights to the manufacturing industry.

LTIMindtree provides:
- Provides IoT, AI, ML, Edge, and Cyber solutions to enable highly connected & digitalized Smart Factories
- Strategic partner for Industry
- Industry 4.0 transformation journeys across the entire manufacturing value chain
- Enables real-time and analytics-driven insights for end-to-end visibility of manufacturing operations

AT&T Business offers:
- Leader in Gartner’s Magic Quadrant for Network Services Global for 13th consecutive time
- 5G transformational business experience including Edge/Private Cellular/MEC
- Nation’s best 5G network for the fourth straight year by Global Wireless Solutions
- Recognized as the Global Leader in IoT by Frost & Sullivan, Magic Quadrant and IDC

Open-ended Innovation
Forge deep, direct connections with applications, clouds, and customers

Accelerated Solutions
Speed time-to-market and lead through barriers

Network Leverage
Build on the best network for innovative applications

LTIMindtree and AT&T together provide Connected and Smart Manufacturing solutions, powered by LTIMindtree’s AI-enabled Insight NxT platform, that enables industry 4.0 and digital transformation across manufacturing operations. This solution also enables advanced capabilities for manufacturers including AI, machine learning, predictive maintenance, digital twin, supply chain visibility, sensorization of assets, augmented reality, and virtual reality training.

The results for our clients include significant improvements in plant-wide connectivity with highly secured wireless/ wire/ cellular networks, operation visibility, OEE, machine uptime and efficiency, product output and quality, predictive maintenance, operator productivity, worker safety, IT/OT integration, and energy management.

Did you know?
To date, only 26% of manufacturers have implemented Industry 4.0 technologies. LTIMindtree and AT&T can help solve the lack of visibility, operational efficiencies, cybersecurity, and so much more!

Enabling the 5G Worker
- Immersive Training
- Remote Assist
- Robotic Machines

Remote Monitoring and Maintenance
- Predictive Maintenance
- Quality Inspection
- Safety & Labor Monitoring

Advanced Logistics
- Material Acceptance
- Robotic Logistics
- Intelligent Warehouses

Together, we deliver solutions that make businesses run more smoothly, efficiently, and securely.
