CASE STUDY

Building Security Infrastructure for a US-based Veterinary Services Provider

By Leveraging Managed Threat Prevention Services

Client

One of the largest privately owned veterinary services providers in the US, operating several clinics across the country.

Challenges

1

A very high false positive ratio at 95%

2

Multiple admin accounts with challenging tracking

3

Several backlog vulnerabilities that required immediate action

4

Need for end-to-end managed threat detection, governance risk and compliance, identity and access management and vulnerability governance services

5

Very high risk of potential insider threats making the organization vulnerable to credential leaks and data loss

Solution

Security monitoring & infrastructure support managed services with 24*7 support for priority incidents

Managed threat prevention services with endpoint, network, cloud, data, and web security

Endpoint Detection and Response solutions consolidation for cost savings

Consolidation of multiple admins accounts into a single service account

Implementation of vulnerability governance, identity, and access management, and governance, risk, and compliance services

Key Benefits

150
Admin accounts
consolidated into a single service
account for efforts savings and
improved access governance

**Reduction in false
positive ratio from
95% to 57%**
in the first two months of
the engagement

**72% of backlog
vulnerabilities**
remediated within the first 2
months of the engagement

**Vulnerability
management coverage**
and Endpoint Detection and
Response (EDR) coverage
improved to 99%

**Enhanced
the existing tools**
to improve the security posture, situational
awareness, and enabled superior regulatory
and policy compliances
