

FACTSHEET

# **FRICTIONLESS MODEL EXPLAINABILITY**

Powered by KenAI

KenAI helps the organization decipher the AI/ML algorithms with ease by leveraging its inbuilt functionality KenAI Govern. It helps simplify the AI/ML algorithm by providing key insights into the predictions made by the model to improve trust and adoption across the organization.

### KenAI Govern helps business teams, data scientists, and ML engineers with a comprehensive view to

Analyze the key features which were responsible for generating the insights from the model

Decipher the black box models and understand the key elements of models

Understand the functional relationship between input and target variables

### Key features of KenAI Govern are

#### Explainable AI

Insights covering the model explanations and importance of features for a particular model

#### What-If Analysis

Analyse the impact of the features on the model insights and enables to study multiple scenarios if the input value changes quickly

#### Model Metadata

Manage the model lineage along with capturing key model information from serialized models

#### Feature Importance

Detailed view of the key features that impact the model predictions along with giving highlighting the important scores for them

# Benefits
