Migration Cockpit

Customers today are invested significantly in custom development to meet their business requirements. Most of these investments are done with ABAP as a technology base. BTP offers various programming models for custom developments but none of them adapts existing customization done in ABAP in a seamless manner. This triggers the need for a migration program to move custom development from SAP ERP to BTP.

Key Outcomes: Building BTP Migration Plan

Migration Assistant
Planning your Migration to BTP to keep Core clean

Value Proposition

Platform-driven BTP Migration plan for custom investments. Migration Assistant has built-in intelligence to provide a rough order of magnitude for BTP Migration. Clients and end customers need not worry about lengthy consulting assignments and SME knowledge to prepare their BTP migration plan. Migration Assistant provides this in an automated structured manner.

“Enhance” & “Rewrite” requires documentation and reverse engineering of existing ABAP programs. Code Visualiser provides a graphical representation of ABAP code which helps in minimizing reverse engineering efforts.

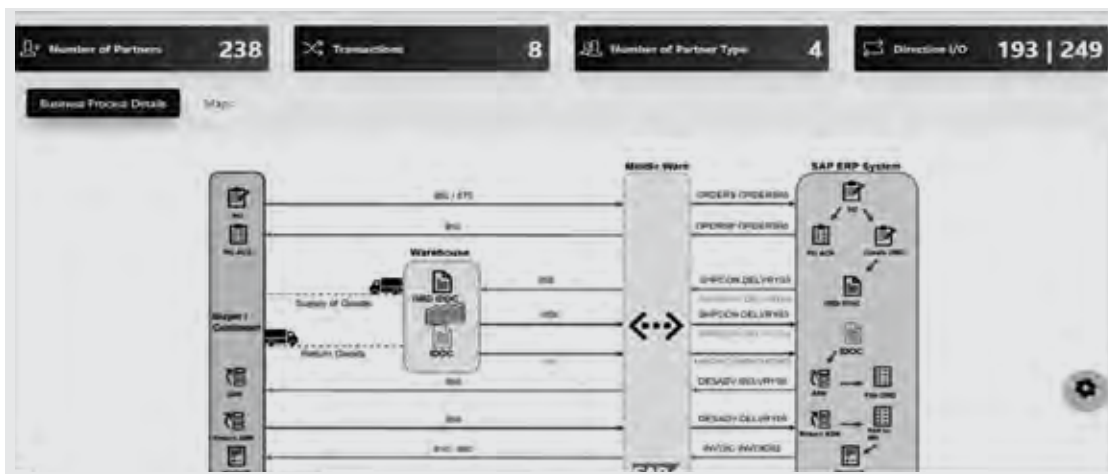

Fiori builder provides an automated way of generating Fiori App and OData services which bring in 40% effort saving in Fiori App development.

2

B2B Integration Assistant

B2B Integration Assistant is an enabler for rapid EDI implementation/migration and partner onboarding. It provides ready to deploy Integrations packages across 375 partners including Banks, suppliers, customers and warehouses.

Key Outcomes: B2B Integration Assistant

- ✔ Connectivity guide to all kind of partners
- ✔ Specifications and maps for older versions available as well in case your partner needs time to upgrade to the new version
- ✔ Enables seamless analysis for partner and map consolidation in case of mergers and offer future sustainability
- ✔ A repository of 375 + partners which will accelerate your partner onboarding
- ✔ Repository of 1000 + maps and specifications across business process, transactions and versions to enable smooth business logic transformation

3

Reimagination Studio for SAP

Our Platform “Reimagination Studio for SAP” orchestrates amplified Business outcomes and provides a simplified path for digital transformation. The platform comprises of ready assets from LTIMindtree, enabled with S/4HANA Best Practices, business process maps, process KPIs and persona maps.

What does “Reimagination Studio for SAP” Offer

- ✓ Focus on ‘**Value for Business**’ through Value Canvas & Value Maps
- ✓ ‘**Quick Reference**’ Repository comprising BPML, Flow Diagrams, Persona serving as ‘**Starter Pack**’
- ✓ Solutioning Navigational Aide – Which process capabilities could be considered, Key Design Decisions..
- ✓ Bringing Process Stakeholders on Same Platform... Have uniform visual framework to review / refine / reimagine

How it helps to accelerate your Digital Transformation initiatives

Value Discovery

- ▶ Value Canvas mapped to business capabilities to process capabilities and KPIs
- ▶ Differentiating processes impacting top 5 KPIs

Value Design

- ▶ Jumpstart to Design & Deploy Solution
- ▶ Encapsulated industry experience & insights
- ▶ Ready to Use process templates, proven practices & awareness of potential hotspots

Value Amplification

- ▶ Facilitates ‘Outcome’ based analysis
- ▶ Visibility of Opportunities, Pitfalls & Trade-offs
- ▶ Guided Roadmap for sharpening Solution design

Key Outcomes: Realizing Vision to Value

Industry specific
Value Canvas

Repository of Business processes,
Key design decisions and personas

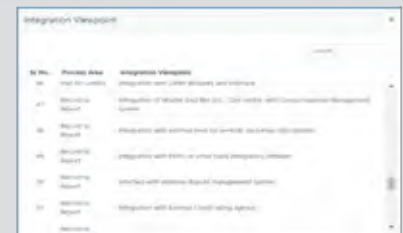

Intuitive roadmap to
deliver business value

Process KPIs
