

Case Study

Driving Innovation for a Japanese Automotive Industry Leader

Client

The client is a Japanese multinational conglomerate that designs, manufactures, and sells automobiles, motorcycles, and power equipment. Outside Japan, the client is active in North America, Europe, and Asia. Additionally, they operate through a vast network of independent local dealers.

Challenges

The client was looking for a partner to help it:

- Transition all the privileged users to CyberArk
- Ensure legacy and cloud applications comply with CyberArk
- Meet the audit and compliance requirements across government agencies
- Enable the adaption of security solution

LTIMindtree Solution

- Improved and maintained the cybersecurity ecosystem to thwart cyber risks
- Onboarded applications and assets into CyberArk and IBM Identity Governance and Administration (IGA) tools
- Created customized dashboards
- Supported CyberArk and IBM tools for L1/L2/L3 capabilities
- Identified and removed open and unused rules/policies leading to threat exposure
- Provided templated solution delivery for faster and more efficient problem-solving
- Implemented automation of repetitive tasks

Business Benefits

Onboarded ~200 servers and applications per month under CyberArk

50% reduction in Mean Time to Recovery (MTTR) for user lifecycle management

Improved ROI through faster application and device onboarding in the invested solutions

50% addition of onboarded applications year-on-year

Well-documented and scripted playbooks created for easy deployments
