Future of Work

PRISM – An Enterprise Fabric
The Future of Work is characterized by a shift towards digital employee experience, powered by workflow automation and integration with enterprise IT systems and delivering a uniform experience.

Importance of Digital Employee Experience in the Future of Work

The next evolution of employee engagement is the digital employee experience. Digital employee experience is powered by workflow automation and integration with enterprise IT systems.

Digital employee experience encompasses a wide range of initiatives, including employee self-service portals, mobile apps, chatbots, and virtual assistants. These initiatives enable employees to access the information they need, when needed, and from any device.

Business Challenges

A successful employee experience in the digital era has many challenges that foster employee satisfaction, productivity, and loyalty. In summary, the following are the key aspects that affect the employee experience in their workplace.

- The disconnected experience that makes it difficult to consume enterprise services.
- Process ambiguity which isolates enterprise functions.
- Siloed systems due to disintegrated platforms, tools, and applications.
- Employee productivity loss yields low satisfaction and less stickiness.
Solution

Our solution addresses the four pillars of the digital employee experience, which centralizes all workplace, employee, and technology aspects in an exceptional way. The key attributes of the individual pillars of Future of Work make the journey map as shown below.

Prism Fabric

**WORKFORCE**
- Employee Experience
- Improving Productivity Standards
- Ever-evolving workforce

**WORKSPACE**
- Connected technologies for seamless experience
- Automation driven service delivery
- Digitized and Cognitive experience

**WORKPLACE**
- Hybrid workplace & ways of working
- Modern workplace
- Facilities at the fingertips

**ALUMNI**
- Employee Centricity
- Employee Delight
- Employee stickiness to organisation
The solution helps address the key attributes pivotal for such a solution.

### Fragmented User Experiences
- User experience design strategy
- Automate labour-intensive manual processes
- Strategy for automation & omni-channel conversation

### Complex Environment
- Reduce siloed tasks in old, legacy systems
- Make ServiceNow portal as scalable
- Lack of operational visibility

### Lack of desired features & product capabilities
- Onboard users to communicate in omni-channel environment
- Create personalized user experience
- Focus on Citizen Development environment

---

Our solution offers an enterprise experience Fabric – PRISM, LTIMindtree’s flagship ServiceNow offering that puts people at the heart of the business. It infuses empathy with a sense of belonging and helps drive connected and engaging experiences for the IT and non-IT personas.

---

The PRISM fabric to rebrand your Enterprise Experience

- Cross-departmental, frictionless workflows (IT and non-IT) hiding backend
- Simple, easy, persona driven experiences
- Agents delivering timely, consistent, and consumer-like service to customer and workspace
- Portal Notifications & Announcements. Drag and drop based personalized widget tiles
- Responsive web design for web, tablet, and phone. Dynamic user-region based translation.
