Secure your multi-cloud environments with LTIMindtree and Microsoft

150% increase in ransomware attacks in 2021[1]

34% of all data breaches are caused by insider threats[2]

579 password attacks are carried out every second[1]

83% of businesses see managing muti-cloud complexity as their biggest pain point in 2022[3]
The Microsoft Security Advantage

Visibility into security and compliance

Protect against increasing, sophisticated attacks

**Manage access for users and apps**

Develop and operate secure apps in the cloud

Leverage industry-leading security

Microsoft delivers end-to-end solutions spanning security, compliance, identity, device management, and privacy, across clouds and platforms.
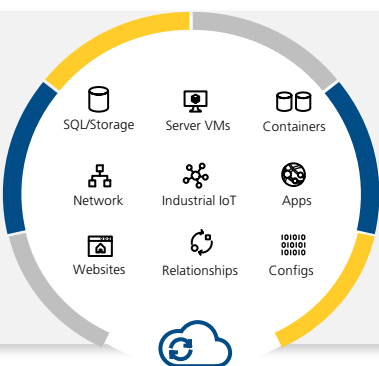

- 43 trillion threat signals analyzed daily
- 785K customers rely on Microsoft for multi-cloud security
- $20 billion investment in the next 5 years to combat cybercrime

30% savings from unifying cloud security tools with Microsoft Defender for Cloud[4]

88% less time responding to threats with Microsoft Sentinel, Microsoft 365 Defender, and Microsoft Defender for Cloud[4]

$479K in human capital freed up by redeploying IT time with Microsoft Endpoint Manager[5]

Strengthen Your Cloud Security Posture

Security Posture Management

Cross-cloud visibility

Secure Score recommendations

Industry benchmarks and compliance

SQL/Storage · Server VMs · Containers · Network · Industrial IoT · Apps · Websites · Relationships · Configs

External Attack Surface Management

Discovery of external facing assets

Continuous risk assessment

Prioritized remediation

Multi-cloud coverage

Azure · aws · Google Cloud

Protect Workloads Against Advanced Threats

Detect threats and protect your workloads

Assess and remediate vulnerabilities

Protect full stack of workloads

Respond and automate

Get actionable, prioritized alerts

Automate with your choice of tools

Manage Access

Control access to critical resources and protect assets

Resources › Identities › Actions › **Microsoft Entra Permissions Management**

Build Secure Apps

» Develop securely, from idea to ship

» Fix vulnerabilities that matter most to your organization in minutes

Trust your software with an end-to-end, automated security solution

Pinnacle XDR

Unlock advanced threat hunting, orchestration and automated response capabilities with LTIMindtree Pinnacle XDR

Pinnacle XDR - A next-gen approach to cybersecurity that provides the best-in-the-class security with a modular, platform-based ecosystem. Powered by automation, Intel-led Threat Hunting with a Defense in Depth approach to cyber security, Pinnacle XDR helps enterprises re-imagine Cyber Security and move from "Reactive Incident Response to Proactive Threat Defense".

The Pinnacle XDR Advantage:

- Service-led modular approach to reach organizations of all types and sizes.
- Everything as a Service model
- YoY improvement roadmap to protect the present and scale for the future

Secure Multi-Cloud Environments Workshop

Get a customized threat & vulnerability analysis of your hybrid and multi-cloud environments and learn how to build a more robust cloud security system with Microsoft and LTIMindtree, helping you prioritize and mitigate potential attacks while learning about benefits and capabilities of Microsoft Defender for Cloud and Azure Network Security.

Ready to learn more?

Schedule a Secure Multi-Cloud Environments Workshop to see how LTIMindtree can help you improve your cloud security posture.
