

CASE STUDY

---

**End-to-End AWS  
Services for Travel  
Technology Company  
Delivers Extensive  
Business Benefits**

# Client

A travel technology company headquartered in America and is one of the largest global distribution systems providers for air bookings in North America.

# Challenges

No control on unused AMI images

No validation of committed code

Need for cost optimization

Lack of visibility on Amazon Machine Image (AMI) image expiry

Manual AWS account setup takes longer time (2-3 weeks) and is error prone

No monitoring system for legacy accounts and AWS service outages

IP address availability management is not tracked

Difficulty in releasing new infra changes

# LTIMindtree Solution

LTIMindtree team collaborated with the customer's operational and engineering teams and proposed the Migration with Managed Services solution as below:

- Designed the AMI expiry solution using AWS core services (Lambda, DynamoDB, etc.) to identify the expired images.
- Designed and developed the product to identify unused AMIs and formalized the deletion process.
- Developed one-click deployment product for building multipleaccounts using AWS core services like Cloud Formation Template (CFT), Identity and Access Management (IAM), code build, and shell scripts.
- Designed and developed the new product for AWS Subnet IP monitoring.
- Integrated the Jenkins file for all AWS repositories for Continuous Integration (CI) build for every code commit.
- Built CI/Continuous Deployment (CD) pipeline and automated updation process of CFT stacks and stack set for infra.
- Developed the code to integrate AppDynamics and Trend Micro agents on all legacy instances.
- Wrote the code to delete unused snapshots for legacy instances using shell scripts.
- Implemented Amazon Health Aware (AHA) and integrated with MS Teams channel to send notifications to cloud team.

# Business Benefits

**\$2766/month**  
saved by  
removing  
unused images

**\$30k cost**  
**savings** per  
month to remove  
unused snapshots

Reduced account  
build activities to  
2-3 days from 2-3  
weeks

Achieved  
**90% AWS**  
account setup  
automation

Reduced manual  
stack deployment  
from 90 mins to 15  
mins to minimize  
turnaround time

Real-time  
infrastructure  
monitoring and  
alerting for  
application teams

Ensured **100%**  
**monitoring** of  
AWS service  
outages using  
AHA

**Reduced 90%**  
of technical  
debts through  
45+ SOP  
documentation

**LTIMindtree** is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by 84,000+ talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — combines the industry-acclaimed strengths of erstwhile Larsen and Toubro Infotech and Mindtree in solving the most complex business challenges and delivering transformation at scale.
