LTIMindtree's SASE Capabilities Protect Against Cyber Threats in the Digital Landscape

Introduction

Data breaches and network vulnerabilities are a constant concern in the digital landscape. Additionally, the rise of remote work, mobile devices, 5G broadband networks, and cloud adoption necessitates upgrading the perimeter-based security model. LTIMindtree's Secure Access Service Edge (SASE) capabilities address these challenges by shifting the security paradigm to focus on user and device identity, context, and application-level access. Our SASE offerings combine network connectivity and comprehensive visibility into a unified solution. It simplifies network management and enhances security posture by converging Wide-Area Network (WAN) capabilities with robust security services.

Business Problem

With enterprises transforming into the digital landscape, businesses need help managing and securing their networks. Organizations undergo an ever-growing challenge of ensuring secure and seamless access to applications and data, regardless of location or device. Legacy network architectures are often complex, rigid, and unable to keep up with the evolving threat landscape. These architectures need help to keep up with the demand of cloud computing, remote workforces, and the increasing sophistication of cyber threats.

LTIMindtree Solution

LTIMindtree provides a comprehensive suite of SASE services across multiple infrastructure areas, such as Secure Web Gateway (SWG) and Zero Trust Network Access (ZTNA), including remote access and inline and out-of-band data protection. It also includes AI/ML-based sandboxing, Advance Threat Protection (ATP), cloud browser isolation for Bring Your Own Device (BYOD), and third-party users.

Our offerings holistically transform networks by converging network and security functions into a unified cloud-native solution. With these capabilities, organizations can enhance performance, reduce complexity, and fortify security while achieving cost efficiencies.

The portfolio includes the following

Advisory and consulting

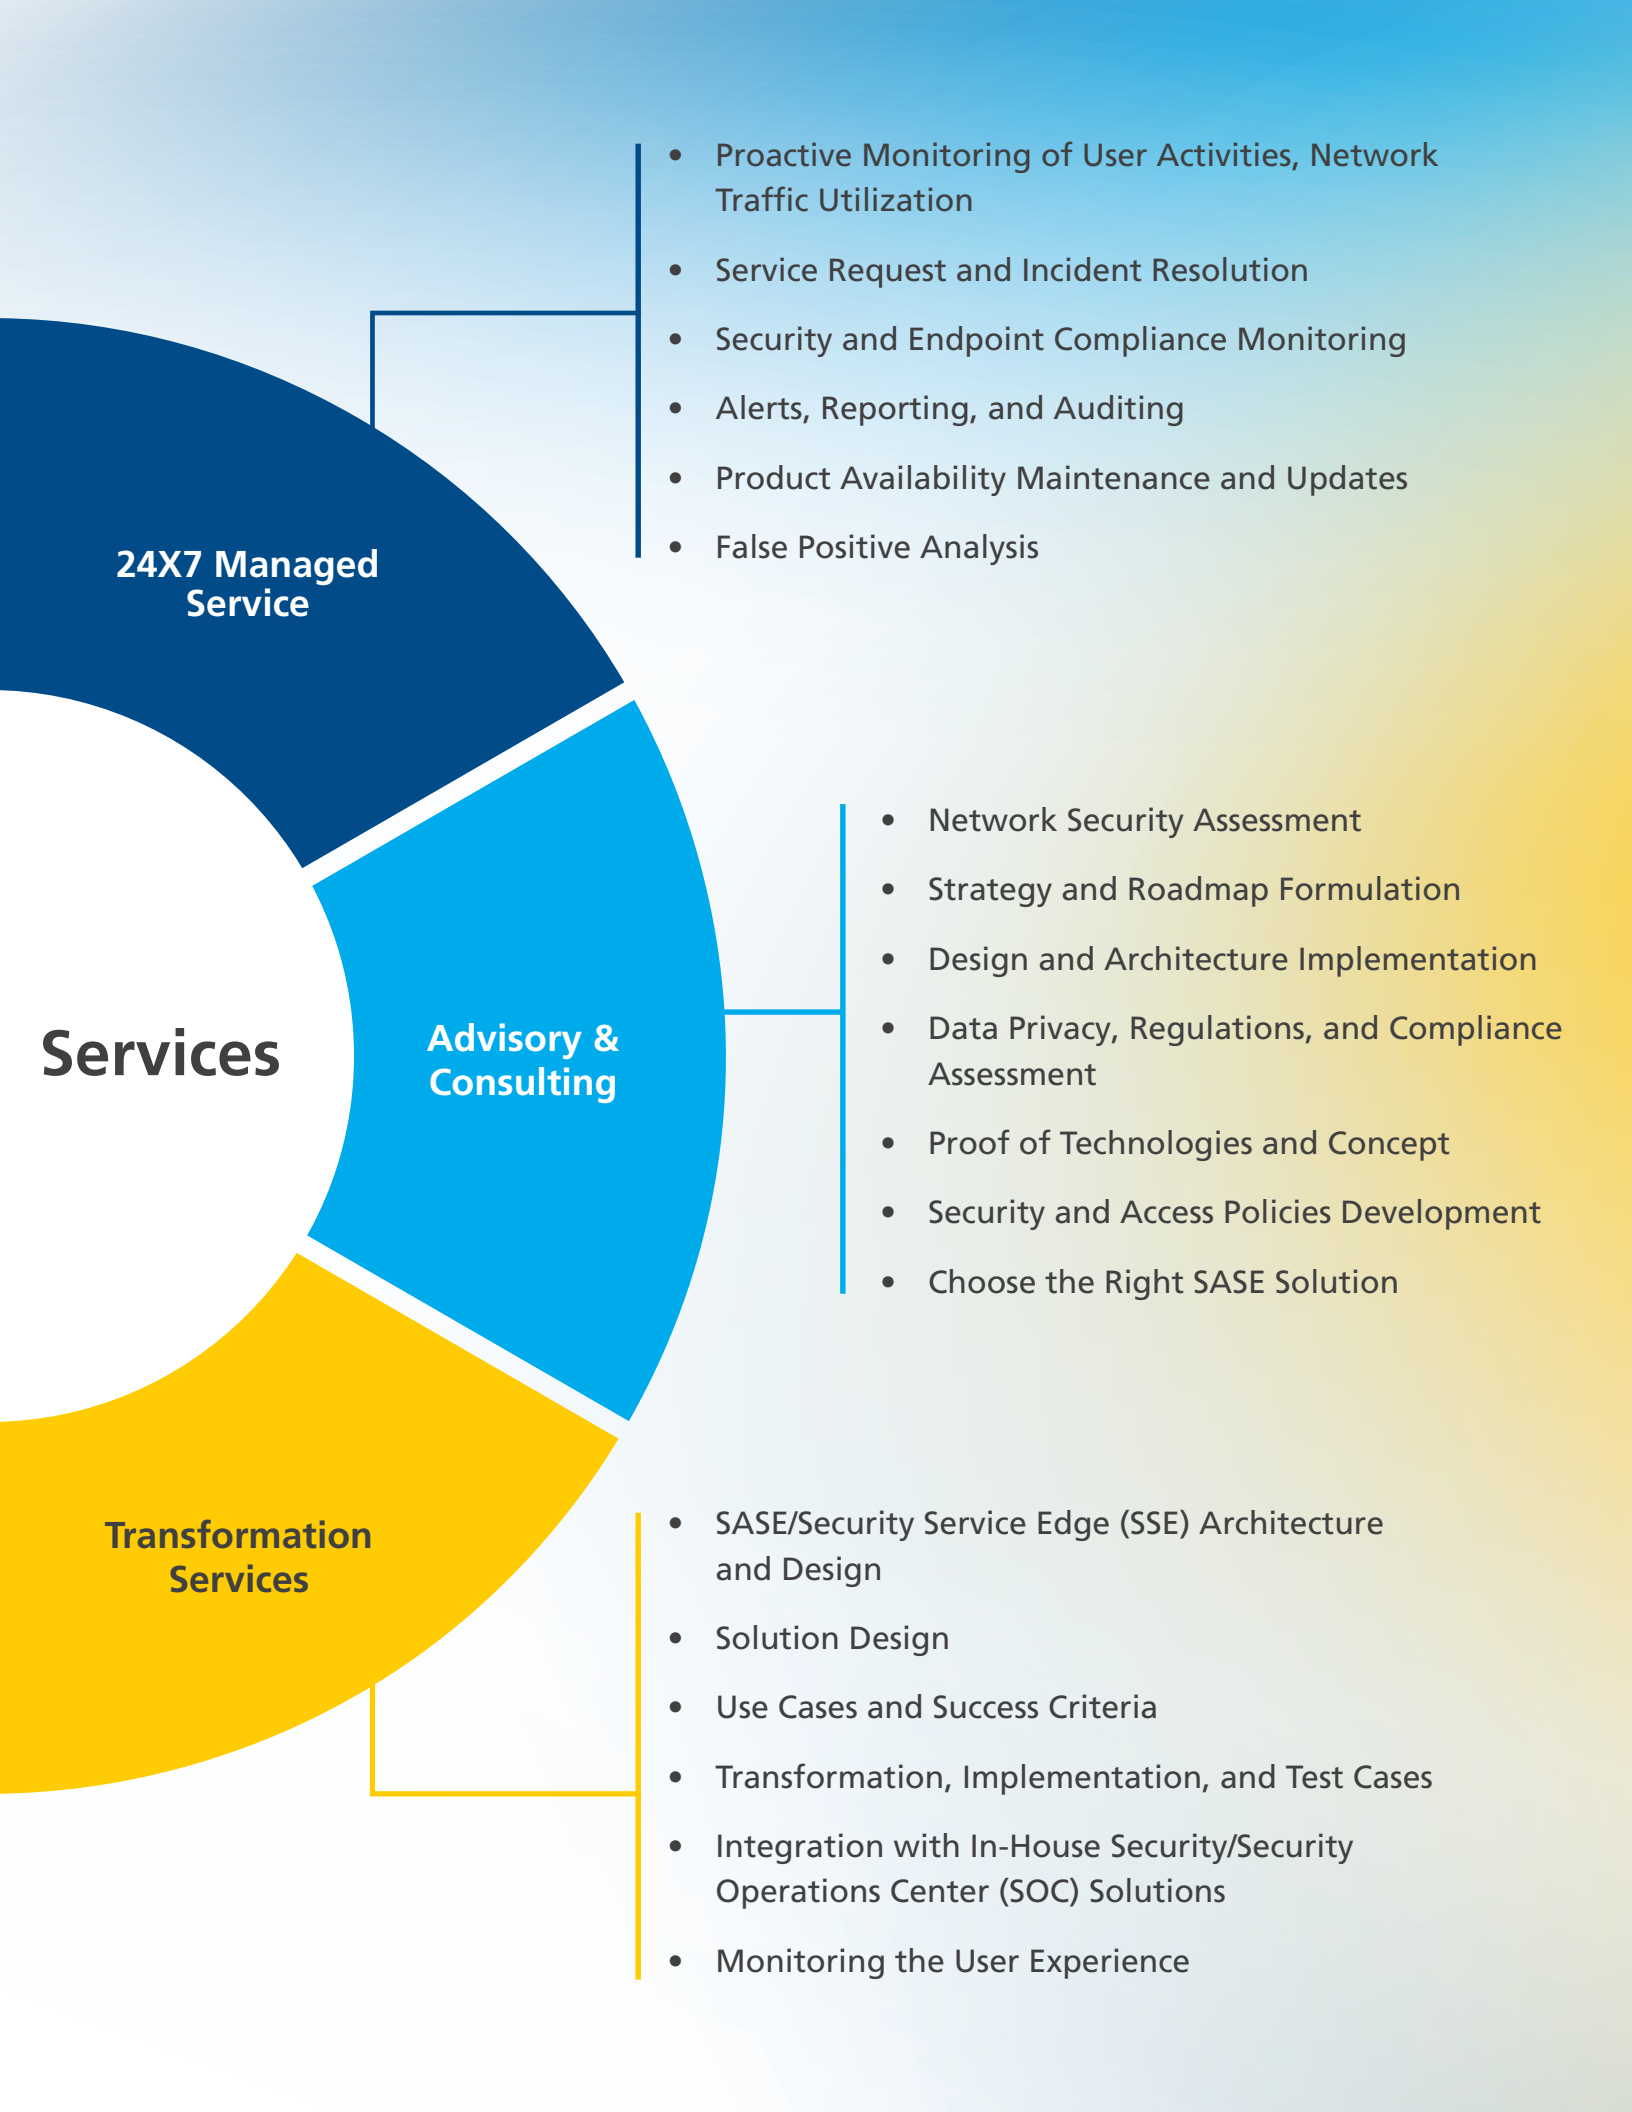

Helps customers assess network security landscape, define strategy roadmap, and evaluate products.

Transformation services

Assesses your current infrastructure, identifies technical gaps, and facilitates transformation to SASE.

24x7 managed services

Performs security cloud platform management, delivering Service-Level Agreements (SLA) and Key Performance Indicators (KPI)-driven operations. It also provides network health check-up, configuration management, service improvement, and measurable metrics and reports.

24X7 Managed Service

- Proactive Monitoring of User Activities, Network Traffic Utilization
- Service Request and Incident Resolution
- Security and Endpoint Compliance Monitoring
- Alerts, Reporting, and Auditing
- Product Availability Maintenance and Updates
- False Positive Analysis

Advisory & Consulting

- Network Security Assessment
- Strategy and Roadmap Formulation
- Design and Architecture Implementation
- Data Privacy, Regulations, and Compliance Assessment
- Proof of Technologies and Concept
- Security and Access Policies Development
- Choose the Right SASE Solution

Transformation Services

- SASE/Security Service Edge (SSE) Architecture and Design
- Solution Design
- Use Cases and Success Criteria
- Transformation, Implementation, and Test Cases
- Integration with In-House Security/Security Operations Center (SOC) Solutions
- Monitoring the User Experience

Why LTIMindtree

- We create a digital core for customers by converging network and security into a unified cloud-native solution and future-proofing digital transformation with its SASE offerings. Optimize SLA/KPI-driven operations with risk/reward model execution.
- Leverage our deep industry and engineering domain synergies to converge SASE with IT and IT/Operational Technology (OT) security and build a blueprint with Zero Trust architecture. This includes device identity, inline sandboxing, data protection, and threat prevention.
- Provide industry-leading technology solutions and support by integrating with our trusted partners and ecosystem.

With LTIMindtree's well-established suite of SASE services, organizations can embrace digital transformation at scale while securing their digital journey.

For more information, please get in touch with info@ltimindtree.com

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700+ clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by nearly 90,000 talented and entrepreneurial professionals across more than 30 countries, LTIMindtree – a Larsen & Toubro Group company – combines the industry-acclaimed strengths of erstwhile Larsen and Toubro Infotech and Mindtree in solving the most complex business challenges and delivering transformation at scale.
