**Track your Inventory in  
Real Time with LTIMindtree's  
Direct to Patient**

## Introduction

The pharmaceutical industry is incorporating the Decentralized Clinical Trials (DCT) approach, where supplies are sent directly to the patient through a specialty courier. A solution is needed to track the movement from the warehouse to the pharmacy at the site to avoid any misuse or pilferage of drugs.

LTIMindtree's Direct-to-Patient (DtP) solution offers comprehensive visibility into inventory movement between the warehouse and the pharmacy. Ensuring compliance with specific storage conditions is easier with the tracking process. This solution simplifies the DtP shipment process and maintains ledger integrity by expediting the Order-to-Cash (O2C) process, enabling real-time inventory tracking, and ensuring timely customer deliveries.

## Business Problem

The existing JD Edwards (JDE) and Dynamic Skeleton Interface (DSI) Mobile Enterprise Platform (MEP) O2C module cannot capture and store inventory movement details to and within the pharmacy. Consequently, business users must manually request warehouse teams to perform inventory transfers. The process may lead to errors in selecting the appropriate inventory location during the shipment confirmation process.

## Our Solution

Leveraging the JDE and the DSI MEP interface, our DtP solution:

- Facilitates seamless inventory transfers between the warehouse and the pharmacy
- Validates the status of the JDE sales orders and shipments
- Verifies storage conditions
- Enables intra-pharmacy material transfers
- Allows shipment confirmation through the DSI MEP and JDE interface solution

## Why LTIMindtree

- LTIMindtree is the ideal partner with the largest JDE team in the industry, including domain consultants with in-depth knowledge of the life sciences industry.
- We provide specialized guidance and customized solutions.
- Our skilled technical professionals handle the various complexities, ensuring seamless integration and implementation.
- We prioritize continuous improvement and innovation, evident through our dedicated research and development labs.
- By staying at the forefront of technology, we deliver cutting-edge solutions aligned with industry best practices.
- Our focus on research and development sets us apart from the competition, enabling us to develop innovative solutions that address your specific needs and challenges.

LTIMindtree embraces the limitless possibilities of technology with a range of comprehensive IT services and solutions, that help empower your business to thrive in this digital age.
