LTIMindtree's Framework for Environment, Social, and Governance (ESG) Planning with GRI Guidelines

Introduction

Sustainability reporting is becoming more common as regulatory measures are implemented, with companies expected to provide comprehensive information on sustainability impacts. However, the absence of a suitable framework creates obstacles in adhering to guidelines and assessing reports, requiring the need for effective frameworks to prepare and manage reports.

LTIMindtree's prebuilt framework is based on the Global Reporting Initiative (GRI) Key Performance Indicators (KPIs) and enables reporting and planning for ESG KPIs and metrics.

Business Problem

Across the globe, sustainability reporting is mainly voluntary. However, regulatory reporting measures on sustainability are becoming more common. Companies are increasingly expected to provide comprehensive information on their sustainability impact as part of their annual filings. However, the absence of a suitable framework creates obstacles in adhering to the guidelines and assessing and comparing the reports.

Collecting data for these reports is a time-consuming and disorganized process. Often enterprises need help to define their sustainability priorities leading to scattered efforts and a lack of focus. Investors are increasingly considering ESG factors to identify risks and opportunities within a company's operations. To overcome these challenges, enterprises need frameworks that help in effectively reporting, measuring, managing, communicating, and preparing reports.

Our Solution

LTIMindtree presents a robust framework that is a ready-to-deploy application with built-in metrics based on the latest GRI standards. It includes the following features:

- Enhances transparency and accelerates the sustainability reporting cycle, reducing the effort for preparing the reports by up to 40%
- Automates report generation by minimizing manual intervention
- Covers all 200+ KPIs on a single system
- Provides detailed reports for faster sustainability cycles
- Benchmarks sustainability performance against past performance and industry metrics
- Enhances risk management and investor communications
- Improves sustainability strategy and selection of performance indicators and targets
- Enhances sustainability performance according to predefined benchmarks, solution framework overview training, customer-centric data, and metadata analysis

Why LTIMindtree

- LTIMindtree brings over two decades of experience in Enterprise Performance Management (EPM) transformation capabilities, with expertise in financial transformation for corporate finance and operational streamlining.
- We specialize in solution building for cost management, financial management, and strategy management solutions.

LTIMindtree embraces the limitless possibilities of technology with a range of comprehensive IT services and solutions, that help empower your business to thrive in this digital age.
