# Delivering Digital Transformation with Scalable & Agile Hybrid Integration Solutions for a Swedish Financial Services Company

## Client

Our client is a Swedish financial services company headquartered in Stockholm. With over 20 years of experience, the client is one of Europe's leading debt management companies with a presence across 11 countries.

## Challenges

Scaling the existing ESB platform as per their business needs

Non-alignment of the existing on-premises integration infrastructure with their "cloud first" strategy

Complex point-to-point (P2P) integrations unable to handle high transaction volumes and expensive to update and maintain

Making the integration of on-prem and other SaaS applications flexible, seamless, simplified, secure, and scalable

Creating more reusable digital assets (APIs) at an organizational level by establishing API-led connectivity and eliminating P2P

High cost and slow time-to-market of country-specific interface customization due to lack of centralized governance

# LTIMindtree Solution

- LTIMindtree implemented a digital integration platform powered by MuleSoft CloudHub Anypoint. This new platform replaced the existing legacy integration layer and integrated applications across 11 countries.
- We also implemented a digital hybrid integration platform-as-a-service with lightweight API and Microservices layered architecture.
- Data entities are now exposed to the ecosystem through a single, reusable API and event-driven architecture to expose business events.
- The solution also enabled centralized logging and analytics, enabling quicker strategic decision-making.
- The setup centralized the C4E governance model for API Strategy, best practices, and delivery acceleration.

## Business Benefits

**50%**

**Reduction** in the time to integrate new applications

**40%**

**Faster** time-to-market for new business functions

**20%**

**Reduction** in enhancement costs and maintenance

**99.99%**

**Increased** availability/uptime using HA architecture

Zero downtime for upgradation

**LTIMindtree** is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world.
