# LTIMindtree's Field Requisition Systems for Streamlining Field Operations

## Introduction

The transportation industry faces the challenge of supporting and maintaining parts on-site. The field technicians need a solution to optimize their work processes and enhance efficiency, which is easy to access on handheld devices, enabling the technicians to use the system while on the move conveniently.

LTIMindtree's Field Requisition solution fully integrates with Oracle Fusion, ensuring smooth data transfer and communication. With our solution, operators initiate requisitions for impacted parts from the site and eliminate the need for a lengthy and time-consuming requisition process.

## Business Problem

The transportation industry encounters challenges when requesting maintenance parts directly from the site. Field operators face difficulties identifying the correct part number and raising a requisition due to the lack of a centralized system for this process. These challenges result in scheduling conflicts, increased travel costs, inefficient work order management, communication delays, reduced team productivity, higher overhead costs, and complications with invoice and payment management. Furthermore, the industry wants to adopt automation, digitalization, and electrification trends.

## Our Solution

LTIMindtree has developed an innovative solution tailored for field technicians that offers a user-friendly interface and powerful features.

- The solution enables technicians to work on the go with convenient access via mobile and tablet devices.
- Integrates seamlessly with Oracle Fusion, facilitating seamless data transfer and communication.
- Enables operators to quickly raise requisitions for impacted parts directly from the site by deploying our solution to a customer's SaaS instance. This allows technicians to work from the site and simplify lengthy requisition processes.
- Simplifies the lives of field technicians, allowing them to focus on their work instead of administrative tasks.
- Identifies the correct part number and helps raise a requisition, reducing delays and increasing overall efficiency.

## Why LTIMindtree

- LTIMindtree provides a wide range of unique selling propositions that sets us apart from other companies in the market.
- With more than 50 domain consultants and over 80 skilled technical professionals, we have the manpower to handle complex projects effectively.
- Our team of dedicated R&D professionals demonstrates our commitment to innovation and continuous improvement.
- We consistently deliver the best solutions catering to our customer's requirements, making us a trusted choice for businesses seeking reliable and innovative solutions.

LTIMindtree embraces the limitless possibilities of technology with comprehensive IT services and solutions, that help empower your business to thrive in this digital age. Experience the benefits of LTIMindtree's solution and take control of your inventory management today.
