

CASE STUDY

Migrating and Modernizing Future & Options Trading Web Application for Investors on Google Cloud

Client

The client is a major British universal banking and financial services company. It has historical and business links to East Asia and a multinational footprint.

Challenges

- The client wanted to migrate applications to Google Cloud Platform (GCP) to harness on-demand scalability benefits.
- Issues with application performance, such as slow initial page loading and delayed responses, negatively impacted user experience.
- Manual testing and deployment procedures extended the cycle time between requirements and releases.
- The aim was to optimize costs by leveraging efficient cloud computing resources and managed services on GCP.
- The company also wanted to reduce licensing costs for the database and web server.

LTIMindtree solution

Frontend and backend containerized deployment on Google Kubernetes Engine (GKE), a managed service

Transition from on-premises licensed software to open-source software on GCP (Oracle to PostgreSQL, WebSphere to Tomcat)

Data migration from Oracle to PostgreSQL

Implementation of an automated end-to-end process for building, testing, security, and deployment through a DevSecOps pipeline

Performance benchmarking of the migrated application in comparison to its previous on-premises version

Code quality assessments and vulnerability scans, addressing issues to ensure the application complies with cloud cybersecurity standards

Benefits & outcomes

- | Inaugural application launch on GCP's India region
- | Elevated quality through automated testing and deployments
- | Enhanced visibility and adherence to SLAs using cloud monitoring and alerts for proactive fault detection and resolution
- | A 50% enhancement in application performance
- | 80% faster deployments
- | Cost savings of USD 1.5 million over a 5-year project period

Tech Stack

- Google Cloud
- Google Cloud Kubernetes Engine
- PostgreSQL
- Aqua
- Ora2pg
- Checkmarx
- SonarQube
- nexus IQ server
- Java
- spring boot
- Selenium
- Grafana
- Prometheus

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by 83,000+ talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — combines the industry-acclaimed strengths of erstwhile Larsen and Toubro Infotech and Mindtree in solving the most complex business challenges and delivering transformation at scale.
