

# ESG NXT

ESG NXT is a holistic platform to measure, monitor and report ESG KPIs and goals at an enterprise level.

Corporates across the globe have committed to sustainability goals and net zero targets, and they need solutions that augment their efforts towards accurate carbon accounting and ESG reporting; devising emission reduction strategies; aiding their transition to renewables; and effectively managing their green investments.

## Challenges

In their GHG accounting and ESG reporting journey, organizations face multiple challenges such as:

- Tedious processes for data collection from different stakeholders.
- Significant effort spent in manually calculating ESG indicators.
- High lead time of manual report generation with a risk of errors and re-work.
- Absence of a solution for tracking progress against set goals.
- Time consuming process to adhere to the audit requirements.

## What can ESG NXT do for you?

Organizations worldwide find that managing the complexity of data collection for reporting ESG metrics is an arduous task. ESG NXT platform helps you to identify material topics, then collect, assimilate, integrate, and validate data from across your value chain. Next, it transforms this data into powerful insights and analytics that enable you accelerate your sustainability journey.

## Modules

### Emissions

Intelligent carbon accounting at organization and product level, air emission analysis, and reporting with a built-in emissions calculator aligned to global reporting frameworks.

### Water and Effluents

Enables holistic reporting on water quality, withdrawal, and wastewater as per regulatory mandates, tracking crucial KPIs and monitoring conservation efforts.

### Waste

Facilitates reporting on waste by tracking generation and disposal processes, promoting circularity, and safe handling practices across the value chain.

### Energy

Monitors energy KPIs including energy sources, fuel analytics, renewables, emissions, and track energy efficiency initiatives.

### Materials

Improves product sustainability and encourages circularity by tracking material KPIs such as type, weight/volume, recycled percentage of raw materials and more.

### Biodiversity

Identifies the significant impacts of business processes on biodiversity and keeps an inventory of initiatives for protecting and restoring habitats.

### Social

Tracks social parameters, ensuring employee well-being and health, diversity, inclusion, and best labor practices to evaluate the social impact and responsibility of a company.

### Governance

Monitors governance parameters, like governance structure, remuneration policies, details on the highest governance body and board diversity amongst others. It enhances governance structure throughout the value chain, involving employees, vendors, and partnerships.

### Tracking ESG goals and net zero journey

The 'initiatives tracking' feature enables the monitoring and achievement of ESG goals through efficiency improvement, identifying emission hotspots, predictive analysis, carbon offset, and carbon credits mechanisms, while the dedicated technology team creates tailor-made solutions.

### Multi-standard ESG compliance reporting

Aligns ESG KPIs to global frameworks such as GRI, EU CSRD, BRSR and other leading ESG reporting frameworks to ensure organizations effectively follow monitoring and reporting requirements.

## Highlights

- ESG goal setting and monitoring capabilities to aid net zero transition.
- Monitor your ESG KPIs, automate reporting, and accelerate your journey towards your net zero goals with ESG NXT.
- Simplified reporting aligned to global frameworks such as GRI, EU CSRD and BRSR.
- Multiple data input mechanisms, including integration with IT/OT (devices, in-house ERP tools, flat files and more)
- Insightful and meaningful dashboards and analytics across a wide range of ESG KPIs.
- Smart data workflow processes for data validation and audit trails.
- Benchmarking for continuous improvement.

## Key Benefits

- Substantial reduction in reporting costs.
- Significant time savings for faster report preparation
- Complete visibility of ESG KPIs across the organization hierarchy.
- Alignment with global sustainability frameworks.
