# Maximize Productivity
Hyperautomation
Leveraging AI and Gen AI

Are you seeking faster, streamlined business processes through hyperautomation?

Are you looking to reduce TCO by 30%?

We can provide a 40% productivity enhancement through hyperautomation

> According to Gartner, over 70% of large global enterprises will have 70+ concurrent hyperautomation initiatives mandating governance or facing significant instability.

Discover: Automation readiness, automation opportunities, process maturity assessments ++

Operate: AI and Gen AI-led process automation (Development, industrialization, and maintenance), CoE setup & run ++

Transform: Bot Re-engineering, tools & platform migration, industry solutions ++

Key Differentiators

AUTOGRIT™ framework, Industry's 1st Automation transformation framework

Unique Automation IPs powered by AI, GenAI, Automation & Analytics that cater to untapped areas of customer needs in automation space

Automation Academy: Training model for grooming associates with automation & next-gen tech .

How do we achieve hyperautomation?

Process Mining to discover automation opportunities, develop bots by leveraging AI/ML,GenAI, Intelligent Document Processing (IDP), process orchestrator, RPA,RBA, lowcode,chatbots ++ for both IT & business processes.

Key IP

HYPERWEAVER	canvas aiops	aspect	canvas iSGS	canvas OPSIGHT	iBOC
Hyperautomation Platform	AI Platform to digitize entire IT Operations	Intelligent Document Processing (IDP)	Intelligent data and video analytics solution	Ticket Visualization and Insights	Integrated Bot Operations Centre

Key Partnerships

UiPath · AUTOMATION ANYWHERE · POWER PLATFORM · celonis · servicenow · ABBYY · XCEPTOR · KOFAX · Microsoft · aws · RESOLVE

Kickstart your hyperautomation journey.
