

Case Study

Identity and access management for American Entertainment Conglomerate

Scope

- Support & enhancement of WM IDM
- WM IDM platform is a set of applications built around Okta using .NET which adds a layer of abstraction.

Key takeaways

The client has **1500+** applications integrated with Okta.

There are around **50K+** WM employees using okta for accessing the applications.

Almost **50K+** B2B users access WM applications through Okta Authentication

Almost **50K+** user logins per day.

Solution highlights

DevOps – Azure DevOps was implemented to reduce the time taken for deployment

QA Automation – IDM Platform test cases were automated using Selenium + C# .NET

Agile process – Helped Warner Media with implementing Agile processes

A C# .NET script was created to verify the SharePoint data and highlight the data errors.

Business benefits

The DevOps implementation has reduced the deployment time from 2 hours to 30 mins per environment

Reduced the test case execution time from 48 hours to 9 hours

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximize growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world. Powered by 84,000+ talented and entrepreneurial professionals across more than 30 countries, LTIMindtree — a Larsen & Toubro Group company — solves the most complex business challenges and delivers transformation at scale.
