Digital Integration Command Center (DICC)

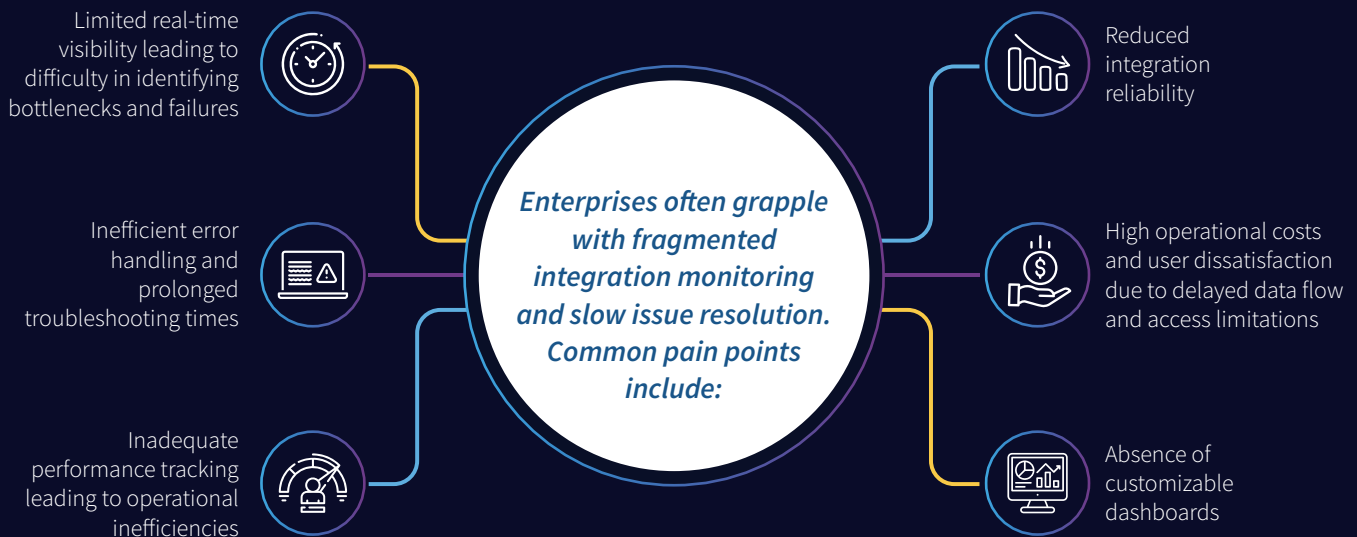

A Centralized Monitoring Tool That Makes Integration Health Easy to Manage

Introduction

DICC offers enterprises a centralized, real-time solution for end-to-end monitoring of digital integrations. It provides visibility into transaction statuses, error reports, and key performance indicators (KPIs), empowering business and technical users alike with actionable insights. With DICC, organizations can streamline integration oversight and enhance operational efficiency.

Business problems

“To overcome these roadblocks, enterprises need a centralized solution that simplifies integration oversight, improves visibility, and accelerates issue resolution.”

Our solution

DICC, built with Oracle Visual Builder Cloud Service (VBCS), connects with Oracle Integration Cloud (OIC) APIs to deliver a seamless monitoring experience. It visualizes key integration KPIs, tracks message flows, and provides intuitive dashboards for proactive issue management.

Highlights

Integration status monitoring

View live statuses (running/stopped/error) of integrations

Role-based access control

Secure visibility based on user roles

Message flow tracking

Understand data movement through visual representations

Search and filtering

Quickly locate specific messages or integrations

Advanced error handling

Configure alerts and trace issues instantly

API integration

Fetch metadata and runtime data using OIC REST APIs

Performance metrics

Monitor throughput, processing time, and error trends

User-friendly interface

Minimize onboarding with an intuitive layout

Custom dashboards

Track specific integrations and metrics relevant to users

Custom status messages

Enable business-friendly configuration of payloads and alerts

Benefits

Gain a centralized view of all OIC integrations, simplifying monitoring and management

Enable proactive identification of integration issues, minimizing downtime

Provide detailed error information and message flow tracking, accelerating troubleshooting

Track key performance indicators, allowing users to optimize integration performance

Improve the reliability of integrations by providing real-time insights into their health and status

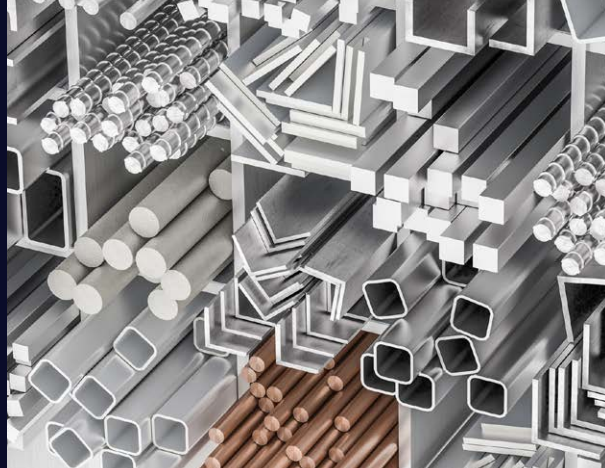

Streamline integration monitoring and management, reducing operational costs

Why LTIMindtree

With unique strengths in Oracle integration and digital transformation, LTIMindtree stands out for its deep domain knowledge and tailored solutions. Backed by 80% certified technologists and 50% domain consultants, we deliver scalable, insight-driven tools like DICC that simplify integration oversight, drive faster resolutions, and elevate operational performance.

Success story

An aluminum and copper manufacturer optimized over 100 integrations using DICC and Oracle SOA Suite 12c. We enabled real-time transaction tracking, proactive issue resolution, and improved supply chain transparency—saving 900+ man hours and cutting time to market by nearly 100%.
