LTIMindtree launches BlueVerse™ RightAction™ for Faster, Safer, and Compliant Enterprise AI

Mumbai, India & Warren, N.J. September 25, 2025: LTIMindtree [NSE: LTIM, BSE: 540005], a leading global technology consulting and digital solutions provider, today announced the introduction of BlueVerse™ RightAction™, a first-to-market AI governance framework for agentic AI to enable intelligent decision-making. The framework, built on LTIMindtree's BlueVerse™ AI ecosystem, helps autonomous AI agents adhere to business rules and regulations, reducing enterprises' risk of costly errors.

LTIMindtree's BlueVerse™ RightAction™ framework integrates AI governance into autonomous agents, ensuring business rules and regulations compliance. Built into the BlueVerse™ platform, it supports supervised and generative models for compliant, context-aware actions, monitoring, documentation, transparency, fraud detection, and rapid low-code deployment. This governance framework supports intelligent decision-making and reduces human intervention, enhancing autonomy, accelerating results, and increasing operational efficiency while building enterprise trust and reducing costly errors.

"With our new BlueVerse™ RightAction™ framework, we're ensuring that the agents of BlueVerse™ act responsibly and are compliant with business regulations. By combining context, intent, and rigorous governance, BlueVerse™ RightAction™ guarantees right action every time, giving enterprises the confidence to embrace the next frontier of AI," said **Venu Lambu, Chief Executive Officer and Managing Director, LTIMindtree**.

BlueVerse™ RightAction™ ensures that autonomous agents take contextually appropriate actions that are ethically sound and compliant with enterprise policies. By enforcing clear guardrails and providing explainability, BlueVerse™ RightAction™ mitigates the black-box risks described by governance experts and enables businesses to trust agentic AI.

To address the existing talent gap and to create a league of AI-skilled talent, LTIMindtree has launched BlueVerse™ Academy, which is currently training 60,000 employees in the first phase. Partnering with major technology firms and academic institutions, the Academy will provide advanced AI training and offer executive programs, workshops, and co-development opportunities. It will also host hackathons and experiential learning for employees and students, supported by internal resources, industry partners, and expert mentors to develop scalable, future-ready AI talent.

About LTIMindtree

LTIMindtree is a global technology consulting and digital solutions company that enables enterprises across industries to reimagine business models, accelerate innovation, and maximise growth by harnessing digital technologies. As a digital transformation partner to more than 700 clients, LTIMindtree brings extensive domain and technology expertise to help drive superior competitive differentiation, customer experiences, and business outcomes in a converging world.
